## COMPETENCES

- Autodidact
- Analytical
- Persistent
- Engaged
- Creative
- Proactive

## Languages

- Ingles B1
- Español - Native

## EXPERIENCE

### FlexiAPI-Laravel Project

Is a basic CRUD application built with Laravel that implements a RESTful architecture to efficiently interact with the database. The project uses Pinia to manage the state of the application, providing a reactive user experience and allowing faster loading of data.

### DevFlow-Proyecto HTML, CSS y JavaScript

Interactive web application designed to simplify and optimize the process of creating programming projects. The inclusion of voice messages in the interface improves the accessibility and understanding of important information, facilitating a more efficient and effective workflow for developers of all levels.

## EDUCATION

**Santander Technological Units:** Technology in development of computer systems (2019-course)

**campuslands:** Labor technician in software programming skills (2024)

**SENA:** Systems technician (2018)

## TECHNICAL SKILLS

- GSAP
- Git Hub
- Angular
- Springboot
- Laravel 11
- Vue.js

## REFERENCIA

**Juan Fernando Reyes Neyra**

Backend Developer
